FOREWORD

IN RESPONSE TO requests for more accurate and complete information about financial aid for college students, the Division of Higher Education, Office of Education, undertook its Student Assistance Project for the collection, analysis, and dissemination of information about institutional student financial aid. This project is under the general direction of Ralph C. M. Flynt, Director, Higher Education Programs Branch, and under the supervision of J. Harold Goldthorpe, assistant director of the student assistance project.

The present bulletin is the third in a planned series of 5 publications of the project, all of which are listed on page ii. It is concerned with the several forms of institutional financial aid, such as fellowships, loans, and employment for graduate students in the academic year 1955–56.

This bulletin is the result of several conferences and many discussions between staff members of the Office of Education and interested groups. The project has had, from its inception, the valuable counsel of a national advisory committee who helped to formulate the original questionnaire and who made many suggestions for the directory. The members of the committee are:

HOMER D. BABBIDGE, Jr., Director, Financial Aids Office, Yale University.

H. F. COTTERMAN, Dean of the Faculty, University of Maryland.

IRENE M. DAVIS, Registrar, the Johns Hopkins University.

J. KENNETH LITTLE, Vice President, Student Affairs, University of Wisconsin.

W. S. MOLLENKOPF, Research Associate, Educational Testing Service.

JOHN U. MONRO, Director, Financial Aid Center, Harvard College.

REXFORD G. MOON, Assistant Director, College Entrance Examination Board.

In addition to the committee, several deans of graduate schools and heads of departments were consulted about the preliminary summaries of the student aid resources for graduate students at their institutions.

The author was also assisted in the preparation of the copy by Jane Conger, Alma J. DeWitt, Barbara A. Ferraro, Alice C. Humphrey, Dorothy C. Merrifield, and Margaret R. Wrenn.

It is hoped that this directory will prove of value to college seniors planning to embark upon graduate work, and to those who have already received their bachelor's or first professional degree and desire to continue their studies. It should also be of value to department heads and graduate school deans who are consulted by students and to administrators interested in the comparative analysis of graduate student aid programs.

LLOYD E. BLAUCH,
Assistant Commissioner for Higher Education.

RALPH C. M. FLYNT,
Director, Higher Education Programs Branch,
Division of Higher Education.

FINANCIAL AID FOR COLLEGE STUDENTS: GRADUATE

INTRODUCTION

This directory is based upon data assembled by questionnaires sent during May 1956 to 1,855 institutions of higher education listed in the *Education Directory, Part 3, Higher Education.* The student aid data sought included graduate fellowships, loans, and employment for the academic year 1955–56. Similarly, the data with respect to earned degrees, student enrollments, tuition and required fees, and board and room charges were those reported for the same year. If an institution is not listed in this directory, it (1) may not offer graduate work, (2) may offer graduate work but grant no financial assistance, or (3) may not have answered the questionnaire.

An earlier publication by the Office of Education in 1951 (*Scholarships and Fellowships Available at Institutions of Higher Education,* Bulletin 1951, No. 16, by Theresa Birch Wilkins), based upon data for the academic year 1949–50, indicated that 265 institutions of higher education awarded 13,659 fellowships having a total value of $9,266,-966. Figures in the present directory indicate that 330 colleges and universities awarded 24,885 fellowships in the academic year 1955–56, which had a total value of $18,239,150. Data on graduate fellowships are listed under the college or university, by major field of study where applicable, together with the average amount of the award.

Information concerning financial aid to graduate students in the academic year 1955–56 is provided for each institution in the following order:

1. Name of institution, location, number of graduate degrees in 1955–56, graduate enrollment (full-time and part-time when supplied by the institution), charges for tuition and required fees for the typical in-State, full-time student, and typical institutional charge for room and board. (The omission of any of these items for a specific institution indicates that either the information was not available or supplied or, in the case

[2] Includes 4,837 assistantships valued at $4,867,845, which were reported as "undergraduate and graduate" by 6 universities.

of charges for room and/or board, that the college or university did not have such facilities.)

2. Total number of fellowships (defined as "grants-in-aid, fee and tuition waivers, remissions and rebates which do not require work or service") awarded, their average amounts, and fields of study when reported by the institution.
3. Number of loans to graduate students (unless specifically stated "to undergraduate and graduate students"), average amount loaned, rate of interest while the student is in school, after the student leaves school, terms of repayment, and size of maximum loan.
4. Number of teaching and research assistantships, their average annual stipend, together with total number other graduate students employed, and their average annual compensation.

The fields of study index is arranged in broad categories, i. e., Agriculture, Biological Sciences, Medical Sciences, Social Sciences, with appropriate subheadings where necessary.

The omission of a field of study from the index, or an institution from the list of those which awarded fellowships in a particular field for the academic year 1955–56, does not preclude the award of a fellowship in a specific field, since a few institutions did not report the fields of study of their fellowship holders. Other institutions grouped several fields of study under one general heading.

It should also be borne in mind that most fellowship awards were made from unrestricted funds and the fields of study in which the fellowships were awarded may change from one academic year to another.

The following definitions should be kept in mind when using this directory:

Fellowships: grants awarded by the institution to a student working for a master's, second professional, or doctor's degree, either in the form of cash or credit against the institutional charges.

Loans: advances of money or credit toward institutional charges which must be repaid, but later than 12 months (one fiscal year) after the date of the loan. (Excluded from this directory are the data relative to emergency and short-term loans which must be repaid within 12 months.)

Employment: payments, either cash from *institutional* funds or in form of credit toward institutional charges, for which the student must render service (including so-called "work" or "service" scholarships and "payments in kind," i. e., board and/or room).

All average student aid figures have been rounded to the nearest $5. The descriptions of the financial aid programs and practices were furnished by the student aid officers and graduate school deans of each institution on the Office's questionnaire form RSH–59. In

the cases of omitted or inconsistent data, supplementary information was requested, and, in a majority of cases, received from the college or university student aid officers. In other instances such items were obtained, verified, and corrected by consulting catalogs and student aid announcements and brochures.

Since the data were collected some changes have occurred in the listed expenses of various institutions and there have been several changes of names. For the latest information, a prospective graduate student should consult the institution's catalog or write directly to the dean of the graduate school or to the departmental chairman of the institution in which he is interested.
